SUMMARY

On June 25, 2022, just before he signed the *Bipartisan Safer Communities Act* into law, President Biden remarked that it was a “monumental day” in American history. “Today, we say more than ‘enough,’” he said. “When it seems impossible to get anything done in Washington, we are doing something consequential.”¹

Passing the *Bipartisan Safer Communities Act* (BSCA) – the first major gun safety legislation to make it through Congress in nearly three decades – was indeed consequential. After years of mass shootings and mounting gun deaths with virtually no action at the federal level, the bill represented substantive progress, enacting a suite of commonsense reforms to help stem the tide of gun violence in the United States.²

These reforms included enhanced background checks for firearm purchasers under the age of 21; funding for state crisis intervention programs and “red flag” laws; the first federal criminal offenses for gun trafficking and straw purchasing of firearms; the closure of the “boyfriend loophole,” which allowed dating partners convicted of domestic abuse to possess firearms; and substantial investments in mental health and school safety, among other critical measures. In less than a year and a half since its passage, it is already moving the ball forward on gun violence prevention both in New York and around the country, keeping hundreds of guns off the streets and out of the hands of those who should not have them.

Senator Kirsten Gillibrand and Jennifer Pryear at the signing of the *Bipartisan Safer Communities Act*

While implementation is only beginning, this report examines the progress made so far in two areas: first, the utilization of the new federal gun trafficking statute under BSCA, and second, the distribution of mental and behavioral health funding authorized by the law. The highlights of the findings are as follows:

01

As of October 31, 2023, more than 160 defendants across at least 20 states have been charged under BSCA's new gun trafficking statute.

02

Law enforcement has seized over 1,300 guns from suspected gun traffickers and their co-defendants, including over 120 in New York State. Considering the existence of sealed or otherwise inaccessible case filings that could not be analyzed in this report, the true number of recovered firearms is likely even higher.

03

At least 190 of the guns seized by law enforcement were AR-15s or AR-style weapons – the same type of firearm used to commit some of America's deadliest mass shootings.

04

In the course of their gun trafficking investigations, authorities have also seized at least 151 ghost guns and at least 176 confirmed or suspected machine gun conversion devices – dangerous weapons that enable criminals to circumvent firearm regulations.

05

Through the end of FY2023, the federal government awarded over \$750 million in BSCA funding for mental and behavioral health services and programming, including nearly \$100 million for New York State and New York-based organizations.

06

Thanks to BSCA grant funding, an estimated 14,000 new mental health professionals will be hired in schools across the country, including 395 in New York State.

GUN TRAFFICKING

ESTABLISHMENT AND APPLICATION OF 18 U.S.C. 933

A Hard-Fought Victory

Firearms trafficking is a significant driver of the gun violence epidemic, and violent crime in general, in the United States.³ The illicit movement of guns across state lines floods communities with deadly weapons and allows criminals to get their hands on firearms they would not otherwise be able to possess. This is a particularly pernicious issue in states like New York, where attempts to implement gun safety measures are consistently impeded by the steady influx of illegal firearms.

According to data from the U.S. Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), **approximately 80% of guns connected to a crime and recovered by law enforcement in New York come from out of state.**⁴ New York has some of the strictest gun laws in the country, but elected officials' efforts have been undercut by years of firearms trafficking up the Iron Pipeline – states along the Interstate 95 corridor that have weaker gun laws.⁵ A 2016 report by the New York State Attorney General's Office found that fully 70% of likely-trafficked guns recovered in New York had originated in just six states: Pennsylvania, Virginia, North Carolina, South Carolina, Georgia, and Florida.⁶

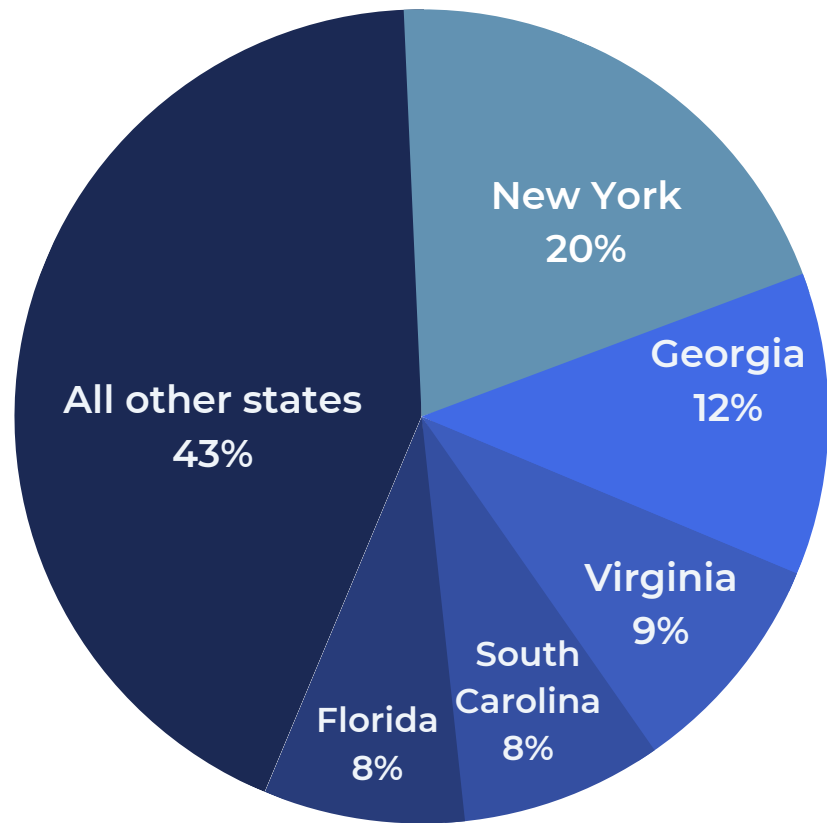

In the absence of a dedicated federal law to criminalize interstate gun trafficking, authorities have historically had to rely on a patchwork of weak, easily exploitable statutes to prosecute offenders.⁷ This has made enforcement extremely difficult and allowed traffickers to operate with little fear of serious consequences.

In Senator Gillibrand's first year in the U.S. Senate, she took action to try to close this loophole and finally make firearms trafficking a federal crime. Her *Gun Trafficking Prevention Act of 2009* was introduced in honor of Nyasia Pryear-Yard, a 17-year-old student from Brooklyn who was killed by a stray bullet earlier that year, and aimed to rid the streets of the illegal guns behind so many of the crimes committed in New York and across the country. Among other measures to crack down on high-risk or corrupt gun dealers, it would have created a

ORIGINS OF CRIME GUNS RECOVERED IN NEW YORK AND TRACED, 2017-2021

statute outlawing the transfer or receipt of firearms “in or affecting interstate or foreign commerce” if the recipient was not legally allowed to possess them or intended to use them to commit a crime.⁸

When the bill failed to pass, Senator Gillibrand reintroduced it in every successive Congress.⁹ It was ultimately named the *Hadiya Pendleton and Nyasia Pryear-Yard Gun Trafficking and Crime Prevention Act* after both Nyasia and another high school student killed by gunfire in Chicago.

Source: U.S. Bureau of Alcohol, Tobacco, Firearms and Explosives, “National Firearms Commerce and Trafficking Assessment (NFCTA): Crime Guns – Volume Two, New York,” January 11, 2023

Following more than a decade of sustained advocacy, Senator Gillibrand finally achieved her goal when the core of her bill was included in the *Bipartisan Safer Communities Act*. BSCA established 18 U.S.C. 933 (“trafficking in firearms”), which made it illegal to “ship, transport, transfer, cause to be transported, or otherwise dispose of any firearm to another person in or otherwise affecting interstate or foreign commerce, if such person knows or has reasonable cause to believe that the use, carrying, or possession of a firearm by the recipient would constitute a felony.” The law also barred the receipt of such firearms “if the recipient knows or has reasonable cause to believe that such receipt would constitute a felony.” Offenders face up to 15 years in prison and must forfeit any property and proceeds related to the violation.¹⁰ With this tool, federal authorities are now able to effectively prosecute gun traffickers, ensuring that they are put behind bars and that illegal guns can no longer flow freely up the Iron Pipeline.

Guns And Traffickers Off The Streets

In the first sixteen months since its enactment, BSCA's gun trafficking statute was put to use in states across the country to prosecute dozens of suspected traffickers. Data provided by the Department of Justice indicates that as of October 31, 2023, more than 160 defendants nationwide had been charged with violations of 18 U.S.C. 933.

To get a more detailed picture of the statute's application, the office of Senator Gillibrand also conducted a review of available case filings and press releases from U.S. Attorneys' offices outlining charges against alleged offenders. The review found that gun trafficking charges were brought in at least 20 states between July 11, 2022 and October 31, 2023, and as a result of these investigations and prosecutions, over 1,300 firearms have been seized by law enforcement so far – including over 120 in New York State. (The full list of cases analyzed can be found in Appendix A.)

WITH THE HELP OF THE BIPARTISAN SAFER COMMUNITIES ACT:

160+ CHARGED WITH GUN TRAFFICKING
1,300+ GUNS TAKEN OFF OUR STREETS

Case Analysis

Disrupting organized gun trafficking rings and gang activity: Authorities have used the new statute to break up gun trafficking operations large and small. In many cases, multiple defendants at once have been arrested and indicted after attempting to traffic dozens of firearms – often to undercover agents themselves. Charges have been brought against suspected gang members, leaders of gun trafficking rings, and previously convicted felons.

In Iowa, for example, four alleged members and associates of the OMB (Only My Brothers) street gang were arrested and charged under 18 U.S.C. 933 for firearms trafficking and firearms trafficking conspiracy. Federal, state, and local law enforcement conducted a yearlong operation to disband the trafficking ring and ultimately seized 73 guns.¹¹ In Los Angeles, two defendants associated with the

El Sereno Rifa street gang were charged with firearms trafficking as part of a joint investigation between the ATF, LAPD, and LA County Sheriff's Department, during which authorities seized 55 guns.¹²

Keeping AR-15s out of dangerous hands: Of the 1,300+ firearms seized in the course of these gun trafficking prosecutions, at least 190 were AR-15s or AR-style weapons. The AR-15 is notorious in the context of gun violence in the United States – it was used to commit 10 of the 17 deadliest mass shootings in America between 2012 and March 2023, including Buffalo, Sandy Hook, Las Vegas, Uvalde, and Parkland.¹³ AR-15s fire bullets at a high velocity that does immense damage to the human body, allowing those who seek to harm large numbers of people the ability to do so quickly and with ruthless efficiency.¹⁴ Perhaps the most infamous configuration is a rifle, but AR-style weapons are also available in other formats that function similarly, like the AR-style pistol that was used to perpetrate the 2021 mass shooting in Boulder, Colorado.¹⁵

In one of the earliest applications of 18 U.S.C. 933, authorities in New York City arrested a group of alleged traffickers from Columbus, Ohio and recovered 13 AR-style guns. According to the complaint, 11 of the guns were “AR 15-style assault rifles,” and the remaining two were an AR-style semiautomatic pistol and an AR-style semiautomatic shotgun. Officers seized a total of 51 firearms that the defendants had transported to the Bronx for sale.¹⁶ In another case in Florida, law enforcement recovered at least 80 AR-style weapons from a suspected trafficker during a series of undercover purchases. The defendant allegedly believed the guns were being smuggled into Mexico to help arm drug cartels.¹⁷

Getting ghost guns off the streets: Ghost guns have featured prominently in several trafficking investigations. Also known as privately made firearms (PMFs), ghost guns are firearms that bear no serial number, making them virtually impossible to trace and extremely difficult to regulate. They can be assembled at home with components sold together in “ghost gun kits” or using a 3D printer, allowing anyone to make their own weapon without first passing a background check. The analysis identified at least 151 ghost guns that were recovered by law enforcement in cases where BSCA's gun trafficking statute was applied.

In a single case in New Jersey, alleged members and associates of the Latin Kings street gang sold 24 ghost guns to an undercover law enforcement officer in a series of controlled purchases. Authorities later seized four additional ghost guns, as well as two 3D printers that were actively manufacturing more firearms, while executing search warrants. They subsequently charged four members of the

gang-led trafficking network with firearms trafficking and/or firearms trafficking conspiracy.¹⁸ In a separate case out of California, two alleged traffickers were arrested after having sold 22 ghost guns, including multiple AR-style rifles, to an undercover ATF agent and a confidential ATF informant over the course of seven months.¹⁹

A TRIBUTE TO NYASIA PRYEAR-YARD

Senator Gillibrand introduced her gun trafficking legislation in honor of Nyasia Pryear-Yard, a 17-year-old victim of gun violence from Brooklyn. Nyasia was a popular honors student and a cheerleader at Nazareth Regional High School. In January 2009, she was struck and killed by a stray bullet while she was out with her friends at a dance party. After meeting with Nyasia’s parents and classmates and hearing their concerns about the illegal guns flooding Brooklyn’s streets, Senator Gillibrand vowed to take action to ban interstate gun trafficking, and she finally succeeded with the passage of the *Bipartisan Safer Communities Act*.

The new gun trafficking statute is already being put to use in Nyasia’s home borough of Brooklyn. In January 2023, authorities arrested four men and charged them with firearms trafficking conspiracy after they sold at least 50 guns to an undercover NYPD officer in Canarsie – only about four miles away from where Nyasia was killed and 1.5 miles away from her high school. The men trafficked firearms from Virginia for the explicit purpose of selling them on the streets of New York.

This was just the first application of the law in Brooklyn, but it will not be the last. As implementation of BSCA continues, more and more gun traffickers will be brought to justice, and more and more illegal firearms will be taken out of circulation. The new criminal statute offers hope that we will not only be able to honor Nyasia’s memory by holding violent criminals accountable, but also prevent tragic deaths like hers moving forward, both in New York City and around the country.

Curbing the proliferation of machine guns: Law enforcement officers have confiscated at least 176 confirmed or suspected machine gun conversion devices (MCDs) from gun trafficking defendants. MCDs, otherwise known as switches or auto sears, are illegal accessories that convert semiautomatic weapons into fully automatic machine guns.²⁰ This makes ordinary firearms more dangerous, giving them the ability to fire 31 rounds in 2.1 seconds, according to the ATF.²¹

In one case in Kansas City, Missouri, officers arrested three alleged gun traffickers who had sold firearms and MCDs to an undercover officer and a confidential informant. Authorities seized 82 firearms from the traffickers in total, as well as 34 confirmed or suspected MCDs that were recovered either individually or already affixed to pistols or rifles.²² In Cleveland, as part of a massive narcotics and firearms bust, law enforcement officials recovered 28 MCDs from a group of alleged traffickers in controlled purchases. They ultimately charged 11 individuals with gun trafficking and recovered 216 total firearms.²³

Cutting off the Iron Pipeline: These investigations paint a clear picture of the Iron Pipeline in action. Several of the accused traffickers obtained firearms – including ghost guns – in states along the I-95 corridor and attempted to sell them on the streets of New York.

In one such case, four defendants were charged with firearms trafficking conspiracy after selling at least 50 firearms to an undercover NYPD officer.²⁴ Federal prosecutors alleged that one of the defendants would “purchase three or four guns at a time” from retailers in Virginia “for the express purpose of bringing them to Brooklyn to engage in sales set up by his co-defendants.”²⁵ In another case, an alleged trafficker was arrested and charged after selling 20 firearms to an undercover officer in the Bronx. Authorities reported that she had “traveled between New York and Florida for the purpose of obtaining firearms to illegally resell in New York.”²⁶

And Upstate, a Pennsylvania-based defendant allegedly admitted to the FBI that he had sold guns illegally across the border into Jamestown, New York.²⁷

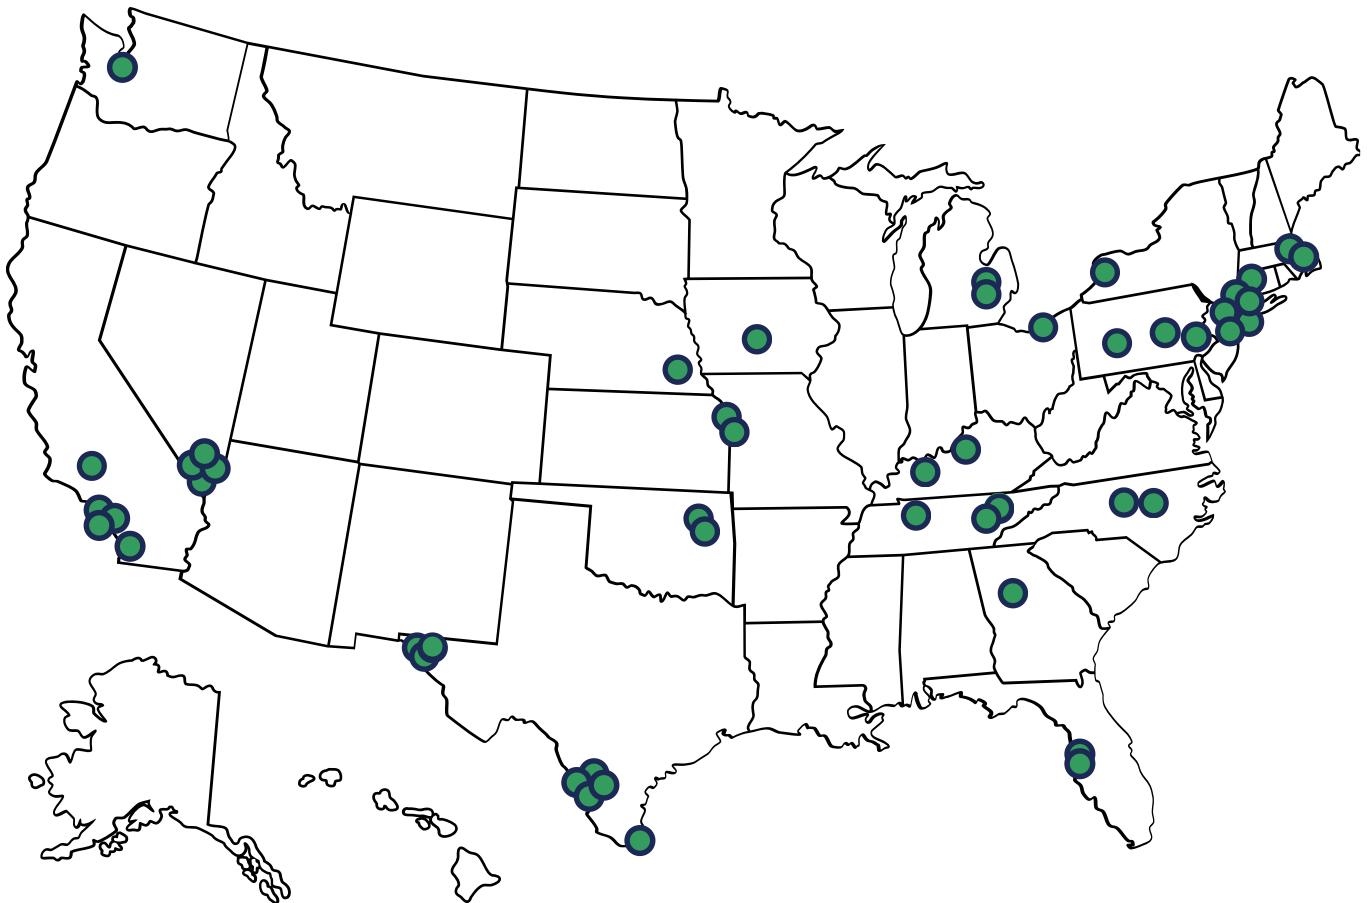

“Two members of the gun-trafficking operation obtained the firearms in Virginia and then transported them to New York to be sold on the streets of Brooklyn. Some of the firearms had defaced serial numbers or were made from ghost gun kits, making them harder for law enforcement to trace.

Two defendants also engaged in significant narcotics trafficking conspiracies, including a fentanyl distribution conspiracy that introduced thousands of lethal doses of fentanyl into our community...”

Source: U.S. Attorney’s Office for the Eastern District of New York, “Four Gun Traffickers Charged with Selling Over 50 Firearms in Brooklyn,” January 11, 2023

GUN TRAFFICKING PROSECUTIONS

SINCE THE BIPARTISAN SAFER COMMUNITIES ACT WAS SIGNED INTO LAW

Putting traffickers behind bars: More than 20 defendants have already pleaded guilty to gun trafficking charges under 18 U.S.C. 933. In the cases analyzed, every individual who pleaded guilty received a prison sentence of up to eight years.

For example, in what is believed to be the first gun trafficking conviction under BSCA, Said Isaac Hernandez was sentenced to over six years in prison and three years of supervised release for trafficking large numbers of handguns to Mexico. Hernandez was caught by Texas authorities with 17 firearms hidden in his car.²⁸ In Nevada, a federal judge sentenced Charles “Cheeze” Sanders to eight years in prison for selling an ATF confidential informant 25 firearms – including three machine guns – as well as more than 800 grams of methamphetamine. Sanders’ sentence also included four years of supervised release following his prison term.²⁹

MENTAL HEALTH FUNDING

DISTRIBUTION AND USE

Along with prosecuting the perpetrators and enablers of gun violence, another key goal of BSCA was addressing the systemic gaps in our mental health care system. Mental illness is not itself a reliable predictor of violent behavior; in fact, research indicates most individuals with mental health issues will never commit any violence at all.³⁰ However, the presence of serious mental illness does somewhat increase the risk of violence.³¹ Additionally, the sheer volume of gun violence in the United States has left many communities suffering with the psychological aftereffects of a shooting, including conditions like post-traumatic stress disorder, major depressive disorders, and anxiety.³² Ending the gun violence epidemic also requires tackling these ample unmet mental health needs.

For this purpose, BSCA dedicated substantial funding to shoring up mental and behavioral health care in the United States, including expanding access to mental health services in schools, augmenting the mental health care workforce, and strengthening our crisis care infrastructure. An analysis by the office of Senator Gillibrand found that through the end of FY2023, the federal government had already awarded over \$750 million in BSCA funding for mental and behavioral health services and programming, including nearly \$100 million for New York State and New York-based organizations. (A full list of recipients can be found in Appendix B.)

Funding Breakdown

Department Of Health And Human Services Grants

The U.S. Department of Health and Human Services (HHS), through the Health Resources & Services Administration (HRSA) and the Substance Abuse and Mental Health Services Administration (SAMHSA), distributed roughly two-thirds of BSCA's mental health funding. The agency awarded \$502.9 million in 589 grants to organizations across all 50 states and DC, as well as Puerto Rico and several other U.S. territories, through the end of FY2023.

BIPARTISAN SAFER COMMUNITIES ACT MENTAL HEALTH FUNDING TOTALS, FY2022-FY2023

| Agency | Branch | Grant | National Funding Total | NY Funding Total |
|--------------|--------|--|------------------------|---------------------|
| HHS | HRSA | Primary Care Training and Enhancement | \$23,357,755 | \$2,000,000 |
| HHS | HRSA | Pediatric Mental Health Care Access | \$17,900,000 | \$300,000 |
| HHS | SAMHSA | Community Mental Health Services Block Grant Program | \$118,750,000 | \$8,019,246 |
| HHS | SAMHSA | Mental Health Awareness Training | \$58,349,147 | \$5,633,481 |
| HHS | SAMHSA | National Child Traumatic Stress Initiative | \$19,485,617 | \$0 |
| HHS | SAMHSA | Project Advancing Wellness and Resiliency in Education | \$80,111,524 | \$0 |
| HHS | SAMHSA | Resiliency in Communities after Stress and Trauma | \$19,899,970 | \$0 |
| HHS | SAMHSA | Trauma-Informed Services in Schools | \$14,933,232 | \$0 |
| HHS | SAMHSA | 988 Suicide & Crisis Lifeline | \$135,159,445 | \$66,874,598 |
| HHS | SAMHSA | Certified Community Behavioral Health Clinic Planning Grants | \$14,952,536 | \$0 |
| ED | | Mental Health Service Professional Grant Program | \$121,325,923 | \$8,203,352 |
| ED | | School-Based Mental Health Services Grant Program | \$131,840,216 | \$3,912,570 |
| ED | | Mental Health Personnel Technical Assistance Center | \$2,599,791 | \$0 |
| TOTAL | | | \$758,665,156 | \$94,943,247 |

Primary Care Training and Enhancement: Primary Care Training and Enhancement - Residency Training in Mental and Behavioral Health (PCTE) grants support mental and behavioral health training for primary care providers, especially those treating children and adolescents. Grantees can use the funds to create and operate mental and behavioral health care training programs, offer financial assistance to medical professionals engaged in such training, or develop new methods of providing care.³³ In FY2023, through BSCA, HRSA awarded \$23.4 million in PCTE grants to 24 institutions nationwide.³⁴

New York-based organizations received a total of \$2 million in BSCA-funded PCTE grants. At the University at Buffalo, \$1 million in funding will be used to help train over 200 family medicine residents in the prevention, diagnosis, and treatment of mental and behavioral health conditions in children and other at-risk populations, including individuals who have experienced or witnessed gun violence. The other grantee, NewYork-Presbyterian Hospital, intends to put its \$1 million toward creating a comprehensive mental health training program for pediatric resident trainees, including a focus on suicide, trauma, gun violence, and substance use.³⁵

Pediatric Mental Health Care Access: HRSA awarded \$17.9 million in BSCA-funded Pediatric Mental Health Care Access (PMHCA) grants to 52 state health departments, school systems, and other organizations in September 2022.³⁶ These grants support pediatric primary care providers' ability to consult virtually with pediatric mental health care specialists to more effectively diagnose and treat mental health conditions in children. Previously, PMHCA grants primarily supported pediatricians, family medicine physicians, nurse practitioners, and physician assistants, but the additional BSCA funding allowed the program to expand further to school-based health professionals and emergency department providers.³⁷

Of the \$17.9 million in BSCA-funded PMHCA grants, New York received \$300,000, all awarded to Albany-based Health Research, Inc.³⁸ The funding will be used to help connect the state's network of 260 school-based health centers to child mental health providers, allowing for referrals, teleconsultation, and specific training to address students' mental health needs.³⁹

Community Mental Health Services Block Grant: HHS, through SAMHSA, distributes Community Mental Health Services Block Grants (MHBG) to state and territorial health authorities on an annual basis. These grants are intended to support the development and expansion of community mental health services,

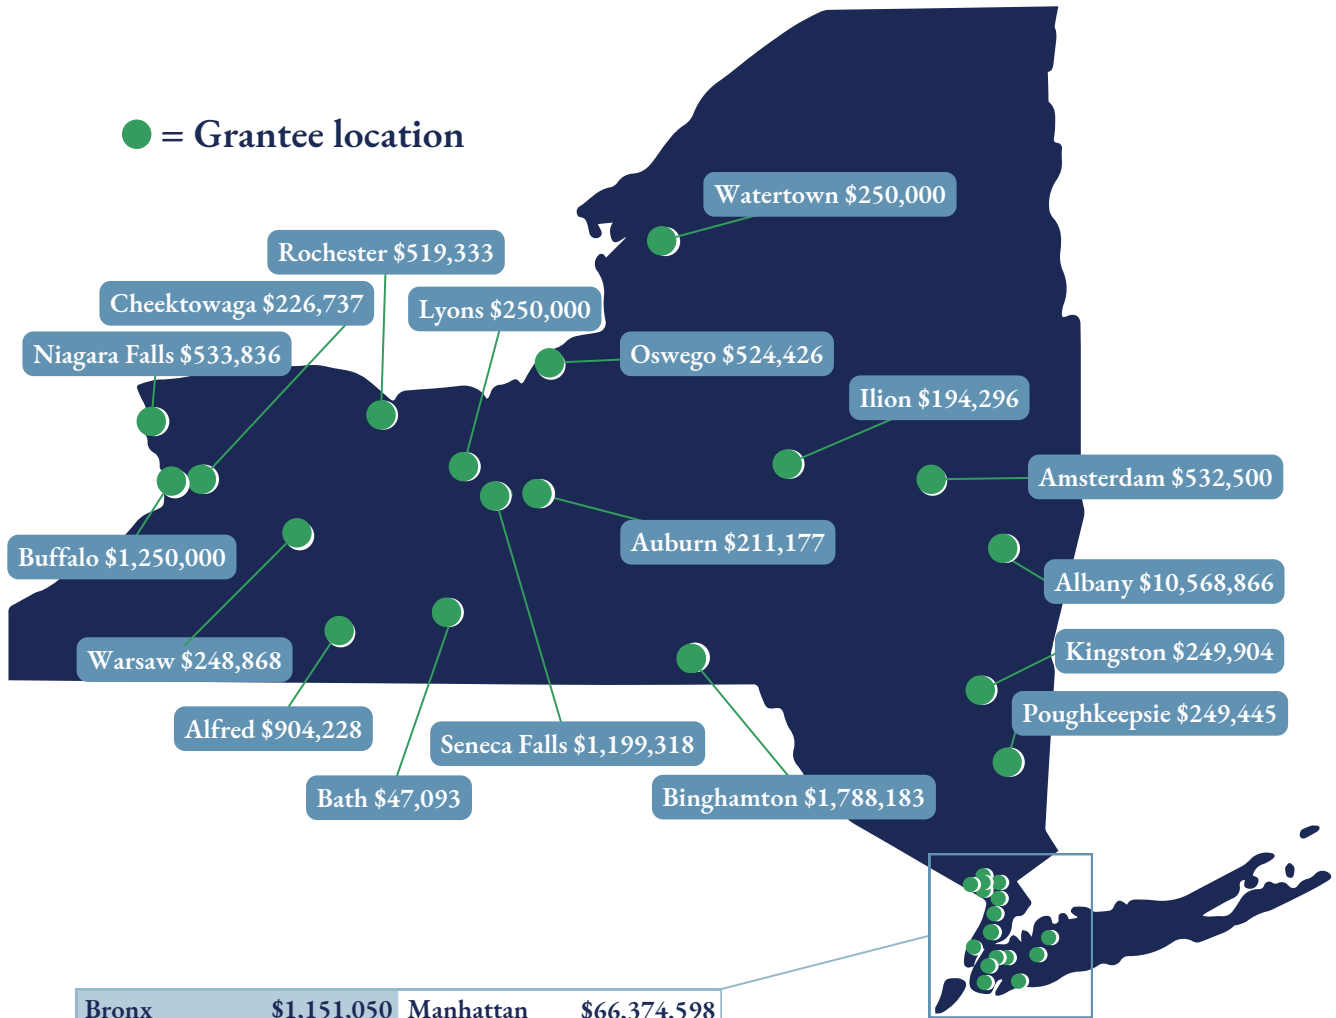

particularly for adults with serious mental illness (SMI) and children with serious emotional disturbances (SED). Since October 2022, SAMHSA has awarded states and territories \$118.8 million in BSCA funding for supplemental MHBG grants. The recipients have used their additional funding in a variety of ways to expand mental and behavioral health services, including adding mobile crisis teams to community mental health centers, increasing crisis response and de-escalation trainings, developing Trauma Response Teams to help children and families in need, expanding the 988 Suicide & Crisis Lifeline system, implementing mass shooting/school violence-specific mental health services, and instituting policies to ensure first responders also receive post-trauma treatment services.⁴⁰

New York was awarded \$8 million in BSCA-funded MHBG grants, all of which went to the New York State Office of Mental Health (OMH).⁴¹ OMH intends to use the funds to develop a Statewide Comprehensive Response to Disasters, which would include a team of highly-trained disaster mental health responders who can rapidly deploy to areas of the state that experience traumatic events, as well as continued training and technical assistance for state and local partners.⁴²

Mental Health Awareness Training: SAMHSA awarded \$58.3 million in BSCA-funded Mental Health Awareness Training (MHAT) grants to more than 200 recipients nationwide.⁴³ MHAT grants support training for school professionals, first responders, law enforcement, human services providers, the mental health workforce, and other community members to recognize and respond to mental health conditions and allow for early intervention. According to SAMHSA, the MHAT grantees aim to train roughly 72,000 individuals by the end of 2023.⁴⁴

New York-based organizations received \$5.6 million in MHAT grants, with at least one awardee in every region of the state.⁴⁵ For example, in the North Country, the Fort Drum Regional Health Planning Organization received \$250,000 to expand rural mental health care access. The organization plans to train nearly 200 social service providers and law enforcement officers every year to recognize mental health conditions, employ de-escalation techniques, and link individuals with mental health care providers, with a special focus on students and the military community. On Long Island, the Marion and Aaron Gural JCC in Cedarhurst will use its \$250,000 grant to deliver mental health awareness trainings to community members, school faculty, and first responders, with the goal of serving nearly 5,000 individuals over the course of five years. And in Central New York, the Cayuga County Community Health Network received over \$200,000 to offer Mental Health First Aid training to community stakeholders in rural areas.⁴⁶

MENTAL HEALTH \$\$\$ RECEIVED IN NEW YORK STATE THROUGH THE BIPARTISAN SAFER COMMUNITIES ACT

| | | | |
|------------------|-------------|----------------|--------------|
| Bronx | \$1,151,050 | Manhattan | \$66,374,598 |
| Brooklyn | \$500,000 | Mineola | \$247,921 |
| Brookville | \$866,498 | Ossining | \$596,234 |
| Cedarhurst | \$250,000 | Suffern | \$245,784 |
| Dobbs Ferry | \$887,088 | Valley Cottage | \$213,827 |
| Garnerville | \$1,750,000 | West Nyack | \$250,000 |
| Jackson Heights | \$862,037 | Woodside | \$250,000 |
| Long Island City | \$250,000 | Yonkers | \$500,000 |

National Child Traumatic Stress Initiative: The National Child Traumatic Stress Initiative (NCTSI) aims to improve the quality of treatment and services for children, adolescents, and families who have experienced traumatic events.⁴⁷ With funding from BSCA, SAMHSA awarded \$19.5 million to 21 NCTSI grantees to support trauma screening and treatment services, including for children who have experienced or witnessed violence. By the end of 2023, the grantees expect to train more than 5,000 individuals in trauma-informed approaches, screen more than 2,800 individuals for trauma, and provide roughly 1,000 individuals with mental health-related services.⁴⁸

Project Advancing Wellness and Resiliency in Education: SAMHSA's Project Advancing Wellness and Resiliency in Education (Project AWARE) program supports the development of school-based mental health services, including training for teachers and school personnel on mental health awareness and resources for schoolchildren with behavioral health needs.⁴⁹ BSCA funded \$80.1 million in Project AWARE grants for 25 recipients, who collectively aim to serve more than 1,000 elementary, middle, and high schools across the country. These grantees expect to train over 17,000 individuals in prevention and mental health promotion by the end of 2023.⁵⁰

Resiliency in Communities after Stress and Trauma: SAMHSA awarded \$19.9 million in BSCA-funded Resiliency in Communities after Stress and Trauma (ReCAST) grants. The ReCAST program promotes resilience, equity, and violence prevention in communities that have recently faced civil unrest, violence, and/or collective trauma.⁵¹ According to SAMHSA, the grantees plan to use the funds for evidence-based violence prevention and community youth engagement programs, providing 1,400 individuals with mental health services by the end of 2023.⁵²

Trauma-Informed Services in Schools: Trauma-Informed Services in Schools (TISS) grants support the expansion of student access to evidence-based and culturally relevant mental health and trauma support services. SAMHSA awarded \$14.9 million in BSCA-funded TISS grants, which recipients will use to build capacity for mental health care and therapeutic support in schools across six states. According to SAMHSA, by the end of 2023, the grantees will have screened nearly 1,000 students.⁵³

988 Suicide & Crisis Lifeline: The 988 Suicide & Crisis Lifeline provides 24/7 crisis support via call, text, and chat anywhere in the United States. Individuals who contact the lifeline are connected to trained counselors, who offer free and confidential emotional support to help people navigate emotional distress and suicidal crises. Evidence suggests that after speaking with a 988 counselor, callers feel less suicidal, less depressed, less overwhelmed, and more hopeful.⁵⁴ The lifeline has already received over 6 million contacts since its launch in July 2022.⁵⁵

Thanks to BSCA, SAMHSA awarded \$135.2 million in grants to build out 988. This included funding for states and territories to strengthen local 988 response and 988-911 coordination; funding to help Tribal entities expand crisis care capacity; and \$64.9 million to Vibrant Emotional Health, the New-York based administrator of the 988 Lifeline.⁵⁶

Between the award to Vibrant and an additional \$2 million to the New York State OMH, New York received \$66.9 million in BSCA-funded 988 grants. Vibrant will use its grant to maintain 988 crisis centers, expand language services, shore up the lifeline's operational capabilities, and broaden access to care for high-risk populations.⁵⁷ OMH plans to provide funding to each 988 crisis center across New York State to create teams tasked with following up after 988 contacts, such as with the contacts themselves or with the community referrals provided. The award will also fund data collection efforts surrounding 988 follow-ups, helping OMH better understand the needs of its service population.⁵⁸

Certified Community Behavioral Health Clinics: In March 2023, SAMHSA awarded \$15 million in BSCA-funded Certified Community Behavioral Health Clinic (CCBHC) planning grants to 15 states. CCBHCs offer 24/7 crisis care, as well as outpatient mental health and substance use treatment, psychiatric support, case management, and other behavioral health services to those in need. These clinics must see people in crisis immediately, regardless of their ability to pay, and provide prompt outpatient care to keep waiting lists short.⁵⁹

Of the 15 states that received these planning grants, up to 10 will be able to join the full CCBHC demonstration program in 2024, allowing them access to enhanced Medicaid reimbursement to support a more comprehensive range of mental health services. In the meantime, the grants will assist recipients in establishing prospective payment systems for reimbursable services, implementing certification systems for CCBHCs, and preparing applications for the full CCBHC program.⁶⁰

Department Of Education Grants

The U.S. Department of Education awarded the remainder of BSCA's mental health funding. Through three grant programs, it awarded \$255.8 million in FY2023 to help expand and strengthen the school-based mental health workforce. As a result of this funding, the Department of Education projects that over 14,000 new mental health professionals will be hired in schools across the country, including 395 in New York State.⁶¹

Mental Health Service Professional Grant Program: The Department of Education's Mental Health Service Professional (MHSP) Grant Program aims to increase the number of trained mental health professionals employed in schools and at local educational agencies. Through BSCA, the Department of Education awarded \$121.3 million in MHSP grants to over 150 recipients, giving them the funds to train and place thousands of diverse, highly qualified mental health providers in schools with the most need. Nearly half of the grantees proposed partnerships with Minority Serving Institutions, Historically Black Colleges and Universities, or Tribal Colleges and Universities.⁶²

Nine New York-based schools and universities received a total of \$8.2 million in BSCA-funded MHSP grants.⁶³ Binghamton University

Community Schools (BUCS) was awarded two separate MHSP grants, totaling nearly \$1.8 million, to expand social work support for roughly 7,000 students in six high-needs school districts in the Southern Tier. BUCS plans to use the funding to train and place one additional social work professional in each district and up to four social work interns in each participating school.⁶⁴ Another grantee, Seneca Falls Central School District (SFCSD), received \$1.2 million for its Finger Lakes NY Mental Health Expansion Project, which will ultimately serve 22 high-needs rural schools with nearly 8,000 students. SFCSD will partner with nearby

IN NEW YORK STATE

universities to strengthen the pipeline of diverse mental health professionals into area schools, aiming to place at least 150 graduate interns who can provide inclusive, evidence-based mental health services to students who have faced trauma, poverty, violence, and other hardships.⁶⁵

School-Based Mental Health Services Grant Program: School-Based Mental Health Services (SBMH) grants, distributed by the Department of Education, aim to increase the number of psychologists, counselors, and other mental health service providers employed in schools. These grants help finance recruitment and retention, retraining, and efforts to increase the diversity and cultural competency of school-based mental health professionals. In February 2023, the Department of Education awarded \$131.8 million in BSCA-funded SBMH grants to 103 states and school districts across the country.⁶⁶

In New York, five grantees received a total of \$3.9 million to increase mental health supports for students. Haverstraw-Stony Point Central School District in the Hudson Valley was awarded \$1.75 million to build a mental health continuum for its students, offering clinical programs, professional learning, and a recruitment and retention system focused on bilingual and diverse candidates. The district expects to hire 19 mental health professionals, most of whom will be bilingual, and also plans to offer free and accessible telehealth family counseling for the students and families it serves. In the Capital Region, the Greater Amsterdam School District was awarded over \$500,000 to hire six additional staffers to support its school-based mental health program, with the aim of significantly reducing appointment wait times, decreasing chronic absenteeism, and increasing graduation rates.⁶⁷

Mental Health Personnel Technical Assistance Center: In September 2023, the Department of Education awarded the University of Wisconsin System \$2.6 million in BSCA funding to establish a Mental Health Personnel Technical Assistance Center – a first-of-its-kind national center dedicated to helping MHSP and SBMH awardees meet their grant objectives. The Mental Health Evaluation, Training, Research, and Innovation Center for Schools (METRICS) will offer resources and support for schools on hiring, training, and retaining mental health professionals, as well as implementing initiatives to address students' social, emotional, and mental health needs.⁶⁸

CONCLUSION

The *Bipartisan Safer Communities Act* represents a significant step forward in the fight against gun violence. Already, it has taken hundreds of illegal firearms and dozens of ghost guns off the streets, disrupted pernicious gang activity and gun trafficking rings from coast to coast, and delivered millions of dollars to schools, municipalities, and nonprofits to bolster our nation's mental health system. While the law's impact will take time to be fully realized, its successes so far offer much reason for optimism.

However, Congress cannot rest on its laurels. U.S. gun deaths declined slightly in 2022, but they remained historically high, and the epidemic of gun violence continues to rage across the country.⁶⁹ Even as BSCA implementation continues, the law should serve as the floor for action rather than the ceiling. Federal lawmakers must continue building on BSCA's progress and working to find lasting, bipartisan solutions to one of our country's most pressing, pervasive, and deadly problems.

METHODOLOGY

For the gun trafficking section of this report, the office of Senator Gillibrand synthesized publicly available information on federal firearms trafficking prosecutions to develop its conclusions. Searches of relevant keywords in press releases from the Offices of the United States Attorneys (USAO), as well as CourtListener's RECAP Archive, were conducted to narrow in on cases where 18 U.S.C. 933 may have been applied. Court records were subsequently accessed via PACER for confirmation of the charges.

The numbers of gun, AR-15 or AR-style gun, ghost gun, and MCD seizures in a particular case were obtained via one of two methods: 1) from the relevant USAO press release when available, or 2) through a manual count of weapons explicitly noted in court documents as having been recovered by law enforcement during a controlled purchase, during an arrest, or as a result of a plea agreement. Weapons were deemed AR-15s or AR-style when they were described as such in court documents or by manufacturers or sellers in an online search of the model. When necessary, relevant charging offices were contacted for clarification on the number of weapons recovered. The total numbers of guns, AR-15s/AR-style guns, ghost guns, and MCDs counted in this analysis include any guns recovered in a case in which 18 U.S.C. 933 was applied to any one of the defendants at any point. In other words, not every weapon was recovered from an 18 U.S.C. 933 defendant, but every weapon was recovered from either an 18 U.S.C. 933 defendant or one of their co-defendants during the overall law enforcement investigation.

The gun trafficking analysis in this report is not comprehensive. Limitations on the case review included the existence of sealed cases for which court records are not currently available, as well as the lack of an easily searchable database of federal prosecutions by charging statute. In light of these factors, the office was only able to find records for about two-thirds of the total number of 18 U.S.C. 933 defendants, according to figures provided by the Department of Justice. This means that the weapon seizure totals and other aspects of this analysis likely understate the statute's successes to this point.

The mental health funding section of the report was compiled through searches of government websites and databases, as well as direct outreach to the Department of Health and Human Services and certain New York-based

grantees. The grants included in the analysis were those that received appropriations from BSCA – largely as laid out in Table 3 of the Congressional Research Service’s section-by-section summary of the law, available at <https://crsreports.congress.gov/product/pdf/R/R47310> – that the office of Senator Gillibrand identified as being explicitly mental health-focused. Grants were also identified through press releases from the White House and the government agencies distributing the funds.

The analysis omitted violence prevention grant programs that received BSCA funding but are not explicitly mental health-focused, such as the Department of Justice’s Community Violence Intervention and Prevention Initiative. However, some of those grantees will likely also direct their awards toward mental health initiatives, meaning that this report almost certainly undercounts the total amount of mental health funding distributed by BSCA.
